About ACM

Association for Computing Machinery

ACM is the world's largest educational and scientific society, uniting computing educators, researchers and professionals to inspire dialogue, share resources and address the field's challenges.

The purpose of this organization is to advance the science, development, construction, and application of the new machinery for computing, reasoning, and other handling of information for the betterment of the society.

acm Association for Computing Machinery

PASC
and its activities

PASC is the most active ACM chapter in Maharashtra. PICT being one of the best colleges in Maharashtra for Computer Science, PASC is a highly prestigious chapter.

Activities undertaken by PASC in 2016-2017:

CS PATHSHALA WORKSHOP:
The initiative of CS Pathshala received a tremendous response from the members of PASC. Help, ideas and projects formed the base of this service.

COMPETITIVE CODING:
A competitive coding seminar was conducted for the members. It included basic idea regarding the topic and the way to navigate in this direction.

LINUXIFY:
A workshop was conducted to aquaint the members with Linux commands, pointer basics and standard sorting algorithms.

and many more...

PULZION`17

Our Events:

JustCoding : A fierce race of coders, JustCoding is a pure coding competition. Participants have to code in the shortest possible time depending on the series of problem statements in order to win!

BugOff : A unique way of testing the programming skills, BugOff will witness the participants turn troubleshooters spotting and rectifying bugs. The code and expected output will be provided to the participants to deBUG and achieve the given output.

Dextrous : A one-of-its-kind competition, Dextrous is analogous to the real world situation. It provides a real life placement experience. Participants appear for an Aptitude Test followed by Group Discussion and are then shortlisted to appear for an interview conducted by eminent professionals from the industry.

Fandom Quiz : It is the good-odd quiz but with a slight twist! Based on fandoms like Harry Potter, Game of Thrones and FRIENDS, its sure to be a great crowd magnet.

Facebook CTF : An event designed in order to spread awareness about cyber security. It uses Facebook's open source Capture The Flag platform to hold a security based competetive event.

planning...

Additions to PULZION'17...

Cerebro : It is a complete package of puzzles, riddles & brain teasers - A perfect mental exercise! The only requisite to excel here is your wit. Be sagacious to attempt Cerebro!

Insight : Talk with the pics and give birth to a marvellous piece of literature, be it a poem or a passage. Insight is a perfect place to quench your literary thirst !

QuiZtoBiD : Ever dreamt of owning the perfect playing XI? We've got all you cricket enthusiasts a chance to create the best team using strategic bidding and experience the thrill, like the IPL auction!

CASHnCODE : Ever thought of earning problem statements? This event is the apt match. Solve questions correctly, earn money, buy problems & code your hard-earned problems to score points !

ELECTRO-QUEST : A compelling merge of a Treasure hunt and Electronics, for the first time. The first round would be a treasure hunt across the campus for hidden components using deductive EnTC related Q's.

PULZION

and its growth

It all began in the year 2014. PASC, in it's very first event Pulzion'14, organized intra-college competitions as Blind Coding, Dextrous, Junkyard and Quiz.

Pulzion'15, based on the theme 'Crossing Boundaries' was organized at a larger scale and new competitions like Hackathon, MyCE and BugOff were conducted. PASC is proud to host the first ever Hackathon at collegiate level in the city of Pune. An overwhelming response from over 2000 students from the city made the second Pulzion a great success.

Pulzion'16 was bigger and better. New competitions and workshops attracting students having diverse interests were introduced. Fandom Quiz, for avid fans of TV series, was applauded a lot. Code Buddy and Facebook CTF were well received by students having keen interest in coding and networking respectively. MadAds, a unique idea in itself, was a stage was marketing enthusiasts. With a foot-fall of over 3000, Pulzion'16 was no less than a dream come true of PASC.

Sponsorship Benefits

Providing sponsorship to events organized by PASC has manifold and long lasting advantages. As ACM is an internationally reputed organization, association of your brand with such a society will surely portray your company in high esteem. Also, PICT is the best college for Computer Engineering. As a result, your logo will be visible to the crème de la crème of brilliant students, who, in turn, will avail the benefits of your services. Pulzion is also an opportunity to build a long term relationship with PICT and PASC which would be beneficial to your company in the long run.
